PROFESSIONAL EXPERIENCE: THE JOHNSON PARTNERSHIP

Steve Campbell joined The Johnson Partnership in May 2001, as a project designer, and since completing his architectural registration in 2007, is now a project architect. Steve is involved with all phases of architectural design work. His responsibilities include working with clients, preparing measured drawings, permit drawings, and computer modeling and visualization. Projects that he has been involved in include residential projects, small commercial projects, and healthcare design. Steve also has a background in desktop publishing and graphic presentation, and experience in developing database projects, along with a specialty in computer renderings and animations. Steve's architectural focus is finding design solutions that reflect his clients' personalities and meet their needs with cost-effective solutions. Steve's strengths include his thorough attention to detail, precise drawing and modeling, and intimate knowledge of our graphics software.

Steve assists with historic resources consulting at The Johnson Partnership in several capacities. He is active in field documentation, assists with report preparation, and provides technical assistance with both TJP's in-house historic resource database, and with entering data to the State Historic Property Inventory database.
